Starquill: Art Deliverables Checklist

Placeholder-art replacement list for artist hand-off. Portrait mobile idle RPG, reference resolution **1080×1920**. Export at **2×** listed sizes for high-DPI.

Rev 2026-07-03 · UI depth: **Hybrid (neutral chrome + illustrated hero art)** · Source: `docs/art-asset-list.md`

P1 Order now — unblocks the playable build P2 Hero content — carries visual identity P3 Deferred — D2/D3 content, lands later

---

Before starting — read these ground rules:

- The **only** finished art today is the paper-doll library (27 species + equipment + weapons). Characters, portraits, and item icons composite live from it — **do not redraw them**. You supply the frames/backplates around them.
- Nearly all text is procedural (names, quests, dialogue, stats, prices) and sits **on top of** art. Leave quiet fields on frames/cards/banners for text to read over.
- UI chrome is built from shared 9-slice primitives — one good chrome set skins all 5 screens. Keep upgrade-green / downgrade-red meaning distinct from decorative color.
- Current placeholder theme is dark (bg `#1A1A26`, card `#232330`). You may redefine the palette.

Parallax background strips	16 (4 biomes × 4 layers)
Combat VFX pieces	5
UI chrome sprites	~14
Icons (across families)	~40
Key-art pieces	24 (base + gem + 7 glyphs + 15 emblems)
Location capsules + ending portraits	10 + 6
Shop / app-level / font	4 + 4

1 · Explore screen: world layer

1.1 Parallax backgrounds P1 Forest + Mountains · P2 Plains + Desert

4 horizontally-tileable strips per biome. Left/right edges must seamlessly tile (they scroll continuously). Scroll speeds sky 5 / mid 15 / ground 30 / foreground 50 px/s. Per-layer sizes below are identical for every biome.

Layer sizes: Sky **2160×1400** · Midground **2160×840** · Ground **2160×420** · Foreground **2160×280 (alpha)**

- [ ] **Forest — 4 layers** (Verdant Hollow, STR/CON)
  Canopy daylight · treeline, claw-marked trunks, warden tower · root-woven trail · ferns/grass overlay.
- [ ] **Mountains — 4 layers** (Gloomspire Ruins, INT/WIS)
  Cold violet haze + ruined spire · stone peaks, broken colonnades · flagstone ledge · rubble/ward-candle overlay.
- [ ] **Plains — 4 layers** (new zone, DEX lean — name TBD)
  Wide sky + towering clouds · rolling grass sea, windmill/standing stones · wagon-rutted trail · tall grass/wildflower overlay.
- [ ] **Desert — 4 layers** (new zone, CHA lean — name TBD)
  Blazing gradient sky + heat shimmer · dune ridges, buried ruins, far oasis · cracked hardpan · dune-lip/scrub overlay.

1.2 Enemies — paper-doll composition P2

No fixed-size enemy sprites. Humanoid enemies reuse the player paper-doll library (no art). Monsters are built from a modular **black-and-white piece library** (colored in-engine) — match your existing sample set's dimensions and conventions.

- [ ] **Monster-piece library (B&W, modular)** — expand your sample set into a full interchangeable piece roster. **Scope pending review of the sample set.**
- [ ] **Boss / mini-boss overlay** — aura + crown treatment that sits on any composed enemy (scale-up handled in-engine; display slot 240×360).

1.3 Combat VFX — net-new, nothing exists P2

- [ ] **Enemy HP bar** track + fill · **~200×12, 9-slice** · fill tinted per stat type (6 colors)
- [ ] **Hit spark / impact** **~128×128 sheet** · 6 flavors (STR dust, DEX silver streaks, CON stone, INT glyphs, WIS glow, CHA swirls)
- [ ] **Death poof** **~256×256 sheet** · enemy defeat (currently just a fade)
- [ ] **Wave-clear sweep / burst** **screen-width** · nothing happens on clear today
- [ ] **Coin burst on gold gain** **~64 coin + particles** · pairs with the gold counter

2 · Global UI chrome P1

Shared 9-slice set used by all 5 screens. This is the foundation — order first.

- [ ] **Screen background** **1080×1920** · 1 shared (or light per-screen theming)

- [ ] **Top bar panel** 1080×140
- [ ] **Bottom nav panel** 1080×160
- [ ] **Bottom nav tab icons** ~96×96 · 5 × 2 Explore / Quests / Loot / Party / Shop, active + inactive
- [ ] **Tab selection indicator** ~176×8
- [ ] **Card / panel** 9-slice, min 120 tall · item/shop/quest cards, tavern rows — used everywhere
- [ ] **Bottom sheet panel** rounded top, 1080 wide · + grabber pill 160×12, + back button 320×90
- [ ] **Buttons** 9-slice, h130/120 · 3 × 2 primary/secondary/destructive, normal + disabled
- [ ] **Progress bar** track + fill · 9-slice, h8–28 · travel, quest, fragment, XP, lock timer
- [ ] **Chip** 120×72, 9-slice · tinted: delta up/down, tier colors, LOCKED
- [ ] **Pip** filled + empty · 20–28 px · ability levels + key difficulty
- [ ] **Banner accent frame** ~1048 wide, 4px edges · quest banner + dungeon HUD
- [ ] **Section rule line** 3px, 9-slice
- [ ] **Ladder nodes** 72 px · ~5 done / current(+ring) / ahead / boss diamond / boss-current + E/H markers

3 · Icon sets P1 currencies/stats · P2 the rest

- [ ] **Gold coin** ~48–60 · 1 top bar, floating numbers, prices, shop
- [ ] **Fragment shard** ~48 · 1 top bar + discovery bar
- [ ] **Key (currency icon)** ~48 · 1 pouch count (full key art in §5)
- [ ] **Stat icons** ~32–48 · 6 STR/DEX/CON/INT/WIS/CHA — item lines, verb cards, stat column
- [ ] **Status effect icons** ~32–48 · 6 Stagger/Bleed/Weaken/Expose/Reveal/Confuse (not yet surfaced)
- [ ] **Rarity item-icon frames** 200×200, 9-slice · 5 backplate behind every item icon
- [ ] **Equipment-slot silhouettes** ~120 · 7 reused as key slot glyphs (§5) — draw once
- [ ] **Quest tier badges** ~64 chip · 4 Normal/Elite/Hard/Boss
- [ ] **Verb category badges** ~40 · 2 Physical / Mental
- [ ] **Cooldown clock icon** ~28 · 1
- [ ] **Mailbox / reward-waiting icon** ~64 · 1
- [ ] **Boost icons** ~96 · 2 Auto-fire Verbs, Verb Speed Up
- [ ] **Portrait frame / ring** 104–300 · 1–2 tavern, recruit sheet, roster selection, party strip
- [ ] **Party-member badge** ~40 · 1 roster grid corner number

4 · Verb cards — text-first P2

Verbs are text: the name (in the game font) IS the card art. No per-verb illustrations.

- [ ] **Verb card frame** 340×180, 9-slice · 6 or 1 per stat color, or 1 tintable master — quiet center field for the name
- [ ] **Cooldown / lock overlay** 340×180 · 1 radial sweep or dim frame

5 · Keys & Destinations

5.0 Key icon — layered system P2

Combinations (10×7×15×6) are impossible flat — deliver stackable transparent layers on a shared **256×256** canvas, aligned so the engine composites base → gem → glyph → emblem. Classic fantasy key, diagonal (bow upper-left, bit lower-right). Everything must read at 104 px.

- [ ] **Base key body** 256×256 · 1 bow + shaft + bit; neutral steel + a tintable grayscale variant. Always present.
- [ ] **Color-family gem** ~72 px in bow · 1 tinted in-engine to 10 families. No color modifier = empty socket. White/Black need edge contrast.
- [ ] **Slot glyphs** ~80 px · 7 helm / chestplate / gauntlet / greaves / boot / sword / ring — **same 7 as §3 equipment silhouettes**
- [ ] **Archetype emblems** ~88 px medallion · 15 one per two-stat build (see table); hint at both stats, stat-color edge optional

Color-family gem tints (exact hex from code):

Red #D94545 · Orange #E68C33 · Brown #8C6133 · Yellow #E0C740 · Green #4DBF59 · Blue #4D85E6 · Purple #A661D9 · White #EBEBEB · Black #29292E · Neutral #8C8C8C

15 archetype emblems (stats · suggestion): Warrior STR+DEX crossed swords · Juggernaut STR+CON anvil/tower shield · Battlemage STR+INT glyph-wreathed sword · Warden STR+WIS axe + sprig · Warlord STR+CHA crowned banner · Skirmisher DEX+CON buckler + dagger · Saboteur DEX+INT gear + bomb · Ranger DEX+WIS bow + antler · Trickster DEX+CHA grinning mask · Sentinel CON+INT eye in shield · Guardian CON+WIS tree shield · Champion CON+CHA laurel chalice · Sage INT+WIS book/owl · Occultist INT+CHA candle sigil · Oracle WIS+CHA third eye + crescent.

Readability priority when all present: gem color > emblem > slot glyph (40 / 30 / 30 drop weighting).

5.1 Location capsule art P3 (Sprint D2)

Banner format: **1032×480** (~2.15:1) card header, tier frame (4 tiers) wraps it. Biome-neutral, twilight/dramatic lighting. **These 10 place-types become the location name-generator vocabulary** — every capsule is nameable, nothing else is.

- [ ] **Castle / Keep** — walled silhouette on a rise, one lit window
- [ ] **Tower / Spire** — lone vertical landmark, storm-lit
- [ ] **Temple / Ruins** — broken columns, overgrowth, light shafts
- [ ] **Cavern / Grotto** — glowing mouth in rock, stalactites
- [ ] **Bog / Marsh** — dead trees in mist, will-o-wisps
- [ ] **Grove / Court** — ring of ancient trees or standing stones
- [ ] **Crypt / Vault** — sunken sealed door, heavy stonework
- [ ] **Camp / Village** — tents/huts, fire smoke, palisade
- [ ] **Bridge / Crossing** — span over gorge/river, toll gate
- [ ] **Shrine / Altar** — small sacred site, offering glow
- [ ] **Tier frames wraps capsule** · 4 Common/Rare/Epic/Legendary, rarity color language

5.2 Location ending portraits P3 (Sprint D2)

Dialogue-scene portraits, **400×400**. Character endings (gatekeeper, traveler, recruit…) reuse paper-doll NPC renders — **no art**. Only object/scene endings need paintings:

- [ ] **Sealed vault door**
- [ ] **Ancient altar**
- [ ] **Abandoned camp**
- [ ] **Mysterious chest**
- [ ] **Monolith / obelisk**
- [ ] **Collapsed passage**

6 · Shop & sheets P2

- [ ] **Chest illustration** ~200–300 · 1 Exploration Chest card
- [ ] **Offline / welcome-back illustration** ~300–400 wide · 1 coin pile or campfire
- [ ] **Premium / remove-ads mark** ~96 · 1
- [ ] **Loot toast background** ~1000×72, 9-slice · 1

7 · App-level P1 font/icon · P3 store art

- [ ] **Uniform game font** TMP TTF/OTF, 2 weights · **High priority.** Carries the whole text layer. Legible at 28px floor; clean numerals (K/M/B suffixes); full ASCII; SDF-friendly for outline/shadow over art.
- [ ] **App icon** 1024×1024 master + Android adaptive (432 safe) + iOS set · nothing assigned on any platform
- [ ] **Splash logo** portrait, on dark #1F1F20 · Unity default shows now
- [ ] **Store art** feature graphic 1024×500 + screenshots · for ship

8 · Open decisions (not blocking art start)

- [ ] **Plains / Desert zone names + stat pairings** — biome briefs in §1.1 stand regardless
- [ ] **Monster-piece roster scope** — pending review of your sample set
- [ ] **Capsule pool sign-off** — the 10 place-types drive the name generator; adding/cutting one changes game content
